

A low-angle, upward-looking photograph of a modern building's glass facade. The building's structure is composed of a grid of light-colored metal or concrete frames. Large, dark, three-dimensional letters are mounted on the glass panels, spelling out 'R I C' from left to right. The sky is visible through the glass, appearing as a clear, light blue. The overall composition is dynamic, with strong geometric lines and a sense of height and scale.

An aerial photograph of an airport tarmac. Three large commercial airplanes are parked on the left side of the frame. The right side features a long, orange-roofed hangar and a parking lot filled with cars and trucks. The ground is marked with yellow and white lines. The text "Safety Vision" is prominently displayed in the center, with "National Incidents & News" below it.

## National Incidents & News

# An airport worker died while servicing a Finnair A350's lavatories

An Aviator Finland ground worker was tragically killed early Saturday morning at Helsinki-Vantaa Airport after becoming trapped between a Finnair aircraft and a lavatory service vehicle.

The accident occurred around 5 a.m. after Finnair flight #AY62, had arrived from Tokyo Haneda and offloaded all passengers. The aircraft was being moved to a remote parking location away from the gate.

According to reports, a towing crew began pushing the Airbus A350-900 back from the gate, unaware that a lavatory waste truck was still stationed under the aircraft's rear, where the worker was actively servicing it.

# Vancouver airport runway will likely be closed for 2 days after cargo plane overruns landing

According to The Aviation Herald, the flight had declared an emergency before landing, reporting it would have to land at a far higher speed than normal due to the flaps problem. Flaps create additional lift, allowing planes to safely slow down.

Airport fire and rescue crews went to standby positions as the plane approach. It landed at a speed of about 175 knots, at least 30 knots faster than usual.

At the time of the landing, Environment Canada's weather station at the airport showed light rain and snow falling for about 1½ hours before the plane landed.

**Local Incidents & News**

A photograph of a city street scene, likely in Washington D.C., featuring the Washington Monument in the background. The foreground shows a group of cyclists riding down the street, with some wearing bright green safety vests. The image is overlaid with a semi-transparent dark brown filter. The text is centered in the upper half of the image.

**This is a chance to add your voice  
to the growing call for safe streets,  
sidewalks and bikeways for everyone.  
Change is possible!**
